

# FERTILITY

## BY THE NUMBERS

*Infertility* is more common than you think. In fact, **1 in 8 couples** experience difficulty becoming pregnant. You are not alone.

*Age Matters.* Women who are **under 30** trying for **12 months** without success and women who are **over 30** trying for **6 months** with no success should check in with a fertility specialist right away.

**OVER  
30yrs old  
6 mos.**

**UNDER  
30yrs old  
12mos.**

fertility  
decreases  
with age

Did you  
know?

Male partner is either sole or contributing cause of infertility in approximately 40% of infertile couples.

*Health Conditions* such as polycystic ovarian syndrome, endometriosis, irregular menstrual cycles, or abnormal hormone levels could be keeping you from getting or staying pregnant.
